

Public Lecture

Wits Great Hall

15 February 2010

16h30

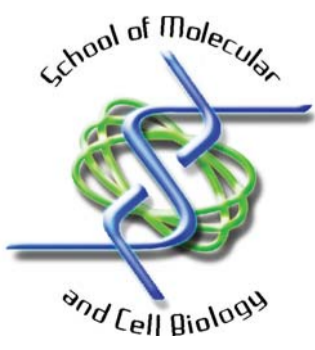

“THE MENACE OF PATHOGENS”

(Emerging and re-emerging pathogens:
HIV, SARS, H1N1 (Swine flu),
Bird Flu, Multiple drug resistance TB,
Klebsiella and others)

Speaker:

Professor Jean-Marc Reichhart
(University of Strasbourg, France)
expert on Innate Immunity.

The spread of these new diseases is a global concern because of their association with animals, continually changing demographics caused by efficient movement of people around the world and because of poor public health facilities in many countries. All this in the background of ineffective therapeutic products. What is the future?
